

VIKING

Let needs decide your choice.

Viking is the result of 25 years of experience of lifting and transferring people in the care sector. All our knowledge of varying lifting needs, ergonomic and functional requirements, technical possibilities and modern manufacturing technology is incorporated in Viking's many features.

Together with Liko's comprehensive range of lifting accessories, Viking is your best friend when it comes to solving different lifting problems. Liko's slings and accessories are available in many different models and versions for everything from light, easy lifts to lifting and transfer of patients weighing up to 500 kg (1,100 lbs.). For more information, study our brochure entitled Lifting Accessories.

Aluminium was the natural choice of material for Viking, not only for aesthetic reasons, but mainly because it makes your lift easier to manoeuvre. Aluminium is also environmentally friendly and easy to keep clean.

There are five Viking models: from super-strong XL to the smallest models, Viking S and Viking XS. Characteristic of all five models is their high lifting capacity in relation to low overall weight.

Let needs decide your choice.

VIKING **XL**

For the most demanding lifts

Lifting heavy patients is a great responsibility. Although Viking XL has been specially developed for very heavy patients, it is also suitable for average-sized people. Despite its size, Viking XL weighs only 42 kg (93 lbs.) and is very easy to handle.

A lifting capacity of 300 kg (660 lbs.) makes Viking XL ideal for all heavy-lifting situations, including lifting from the floor. Equipped with Armrests (accessory), XL is ready for gait training, making it an invaluable aid to rehabilitation, even for extremely heavy patients.

Heavy becomes light

Safe lifts of up to 300 kg (660 lbs.) are a breeze with Viking XL and Original Highback.

Safe and secure gait training

With Armrests and Liko Lift Pants, Viking is perfect for gait training.

Balanced horizontal lifting

With Liko FlexoStretch and Stretch Leveller, even the heaviest patients can be lifted in a horizontal position.

Max.load: 300 kg (660 lbs.) Weight: 42 kg (93 lbs.) Prod. No.: 2040003

VIKING **L**

Strong and easy to manoeuvre

Viking L is incredibly manoeuvrable in relation to its impressive lifting capacity and is ideal for all the most common lifting needs as well as for heavier patients. Like all models in the Viking family, Viking L's low weight makes it very easy to handle.

Viking L can be equipped with Armrests, making it ideal for gait training.

Liko's product range includes lifting accessories that have been specially developed for rehabilitation gait training.

All the way, directly from the floor

Liko Original Highback and Universal Twinbar 670, which provide extra space for the shoulders and stomach, enable heavy lifts directly from the floor.

Perfect lifts

Safe and secure everyday lifting with Liko Universal Sling.

Quality down to the last detail

Large, easy-rolling castor wheels are standard on Viking.

Viking L

Max.load: 250 kg (550 lbs.) Weight: 40 kg (88 lbs.) Prod. No. 2040004

VIKING M

The all-round lift

We're convinced that Viking M will become your new favourite lift. After 25 years of market-leading product development, we know how to design the optimal mobile lift. Viking M has most of the best features and is ideal for the most common lifting situations.

Despite its low overall weight, Viking M manages lifts of up to 205 kg (450 lbs.). It's easy to use and manoeuvre, enabling convenient access even in bathrooms where space is limited.

Together with Liko's functional slings and accessories, Viking M is the perfect all-round lift for caregivers with big demands and wide-ranging needs. Equipped with Armrests, Viking M becomes an ideal aid to gait training and rehabilitation.

Gait training daily

Liko MasterVest with front fastening is easy to apply.
With Armrests, Viking M is ready for gait training.

Horizontal lift OctoStretch

Liko has many excellent accessories for horizontal lifting. OctoStretch, pictured here with Liko's Stretch Leveller.

Extra care
Sling Crossbar 450 makes Viking even more comfortable for particularly sensitive patients.

Viking M

Max.load: 205 kg (450 lbs.) Weight: 35 kg (77 lbs.) Prod. No. 2040005

VIKING S

Small but strong

Viking S is a compact, versatile mobile lift that performs superbly in relation to its small size and low overall weight – perfect for care settings with limited floor space.

Viking S is appropriate for all common lifting situations; e.g., transfers between bed and wheelchair, to and from the toilet and bathtub or for lifting someone who has fallen to the floor.

Viking S weighs only 25 kg (55 lbs.) but can lift patients up to 160 kg (350 lbs.) – an unbeatable feat for a lift this size.

Lifts with Comfort

Viking S and Liko's Original Sling, a great combination for easy lifting.

All the way, directly from the floor

Original Highback gives the patient comfortable support during the entire lifting operation.

Widen the base at a touch

Both Viking S and XS feature practical mechanical base-width adjustment. Perfect when lifting from a wheelchair.

Viking S

Max.load: 160 kg (350 lbs.) Weight: 25 kg (55 lbs.) Prod. No. 2040006

VIKING XS

For tight spaces

A mere 54 cm (21 inch) wide, Viking XS is one of the narrowest lifts on the market and it passes easily through narrow doorways.

Viking XS is a stable and reliable mobile lift that is ideal in most common lifting situations; e.g., to and from the toilet, between bed and wheelchair, or for lifting from the floor.

Like all Viking lifts, XS is made of aluminium, and despite a lifting capacity of 160 kg (350 lbs.), it weighs only 25 kg (55 lbs.).

Aluminium is strong, environmentally friendly and easy to keep clean.

Safe, easy lifting

Liko Original Sling is ideal for most common lifting situations. The arms can be held inside or, as pictured here, outside the sling.

Lifting from the floor

All Viking lifts can lift patients directly from the floor.

For bathrooms where space is limited

With an appropriate sling such as a Hygiene Sling with safety belt and narrow Viking XS, obstacles are no match.

Viking XS

Max.load: 160 kg (350 lbs.) Weight: 25 kg (55 lbs.) Prod. No. 2040007

Aluminium – the green metal

Aluminium wasn't chosen as the material for the Viking series simply by chance. Arguably, aluminium production is energy-demanding, but once refined, the metal will never rust. The material's low weight makes the lifts easy to handle, with minimal strain on the back and shoulders. And there are significant environmental benefits as well. Aluminium can be reused again and again, and recycling requires relatively little energy.

Lifting a person requires both technically superior assistive devices and insight into medical complications. Liko specializes in lifting and transferring physically disabled people. For more than 25 years, Liko has successfully specialized in the design, development and manufacture of safe, easy-to-use assistive devices. Much of our success is based on our combination of high-tech expertise, knowledge of medicine and our own experience from work in the care sector.

Liko is a Swedish company. We are market leading in the Nordic region and are represented by our own subsidiaries and distributors in more than 30 countries worldwide.

Design and Quality by Liko in Sweden.

Liko is quality-certified in accordance with ISO 9001 and its equivalent for the medical device industry, ISO 13485.

Liko is also certified in accordance with environmental standard ISO 14001.
